

RENOVATION CHECKLIST

Gearing up for your next remodeling project.

- Decide on your budget and how you will finance your new project.
 - **Options for a remodel include: cash, credit card, home equity loan, and Builders Surplus financing.**
- Figure out your style.
 - **There are so many facets to discovering what design style you like. At Builders Surplus, we have designers on site that can help you narrow down ideas and get you started on your custom renovation.**
- Will you be selling or staying after this renovation?
 - **Factor in whether or not you will be remaining in this home. If you are planning on remodeling to sell your house, you will want to cater design choices towards potential buyers.**
- Is this a major remodel?
 - **Renovations that involve plumbing, electricity, foundation leveling, and removing walls typically call for a professional eye and can be quite an undertaking. Before starting construction, consult a professional to ensure your safety and making sure your ideas are up to code.**
- DIY vs. Professional
 - **There are plenty of projects that can be completed with your two hands! There are multiple resources on our blog, Youtube channel, Instagram, and Pinterest boards that can assist you with your many projects. We have the option of professional installation services in the case you don't want to do it yourself!**
- Shop local.
 - **You can easily become a number inside of a big box store, so why not utilize local vendors? Builders Surplus's goal is to take the pain out of remodeling and we offer unused, first quality products at incredible prices.**
- Choose materials that fit your lifestyle AND plan for the future.
 - **Whether you are a pet owner, a mother of three, a crafter, or a brand new homeowner, our designers take your lifestyle into account. A person with a puppy would choose different flooring than a bachelor, and the family with kids would consider a stain resistant countertop. Use our experts' knowledge in order to choose the right products for your remodel.**
- Get the most out of your new investment.
 - **By purchasing energy efficient and eco-friendly products, you will be saving money and that can be put towards your next renovation project.**
